

ELITE SPORT®
GOALKEEPING

CATALOG 26/27

BORN FROM PROTECTION. BUILT FOR PURPOSE.

ELITE SPORT WAS BORN FROM A FATHER'S
INSTINCT TO PROTECT WHAT MATTERED
MOST - HIS SON, WHO FOUND IN GOALKEEPING
A DREAM AND A PURPOSE.

When he couldn't find gloves that combined grip, durability, and professional quality, he decided to create them himself. What started as an act of love became a mission shared by millions: to craft high-performance gloves with extreme grip, real durability, and cutting-edge technology — all at a fair price.

For over a decade, Elite Sport has challenged industry standards, redefining what goalkeepers can expect from their gear. Today, our gloves are trusted in more than 37 countries, by professionals and amateurs alike, united by one mindset: the will to protect, to lead, and to believe.

ELITE SPORT 26-27 COLLECTION

FOR THE MINDS THAT REDIFINE GOALKEEPING...

Every save begins before the shot. In the silence between instinct and action — where the mind sharpens, and innovation takes form. Everything keepers do — every read, every dive, every save — they do with their Elite Sport® gloves, built to match the way they think, move, and perform.

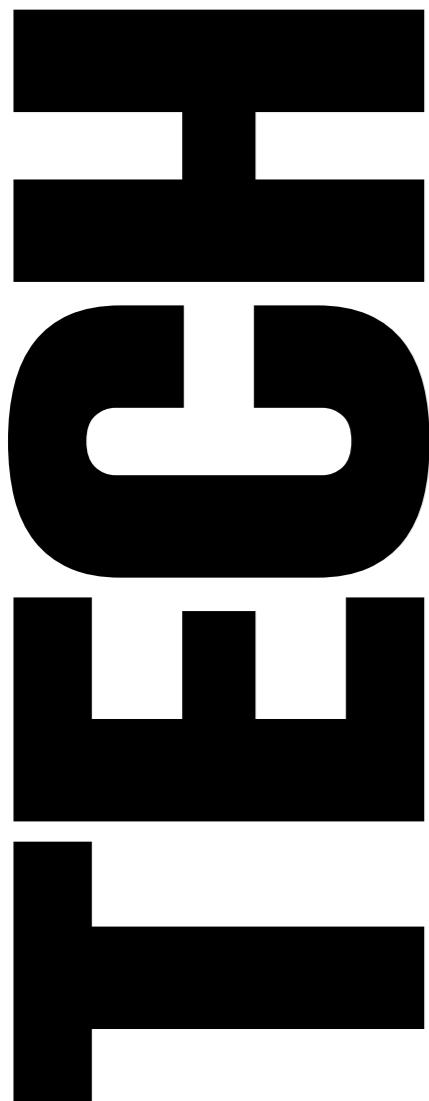

This season's concept builds upon the core philosophy of Elite Sport®. The 26-27 collection understands the modern goalkeeper, where our technology and the mentality of elite keepers merge to redefine what it means to protect, lead, and create from the last line.

SEIZE THE MOMENT WITH GRIP THAT WON'T SLIP.

Elite Sport uses only **specially-formulated** and patented **latex** to achieve unrivalled grip, comfort and flexibility, without sacrificing durability. All Elite goalkeeper gloves are match-ready, with our high-quality latex on the palm, backhand and wrist strap.

SUPER CONTROL **ES-V** **CENTUM+** **ULTRA GTECH** **ESTEC AQUA**

BE IMPENETRABLE. WE'VE GOT YOUR BACKING.

All our gloves have **4 or 5 mm of cushioned backing foam**, combined with Elite Sport's proprietary latex and high tech fabric. Gloves are sufficiently reinforced in the Shock Zone to protect the hands when punching and blocking incoming balls.

Elite Sport's proprietary latex ensures they have extended durability with frequent, aggressive use. Some Shock Zones are flat, while others feature Elite Sport's specially-constructed 3D embossing.

THE WINNING FORMULA.

To ensure our gloves **offer the best quality and durability**, they are designed with german latex that guarantees elite performance in every game.

THE WORLD'S MOST REVOLUTIONARY CUT.

Our flash cut was redesigned to feel **like a second skin**, with an even tighter and more anatomical fit thanks to the double wrap on the thumb, index, and pinky fingers.

Each finger is wrapped with millimetric precision, eliminating unnecessary space and increasing real control over the ball.

At Elite Sport®, these 6 elements aren't features — they're **non-negotiables**.
